

ARK Healthcare

We understand the chemistry

10+ YEARS
OF EXCELLENCE

IN ACTIVE SUBSTANCE MANUFACTURING AND SUPPLY

ARK HEALTHCARE Private Limited is a fully integrated pharmaceutical company.

We take pride in our commitment to advancing healthcare through the manufacturing of Active Pharmaceutical Ingredients (**APIs**). With our GMP Certified manufacturing unit located in Punjab, India, equipped with state-of-the-art Production and Quality Control systems, we stand as a leading manufacturer in specific therapeutic categories, including

Anti-Diarrhoeals

Anti-Psychotics

Central Muscle Relaxants

Anti-diabetics

Anti-Leishmaniasis Drugs

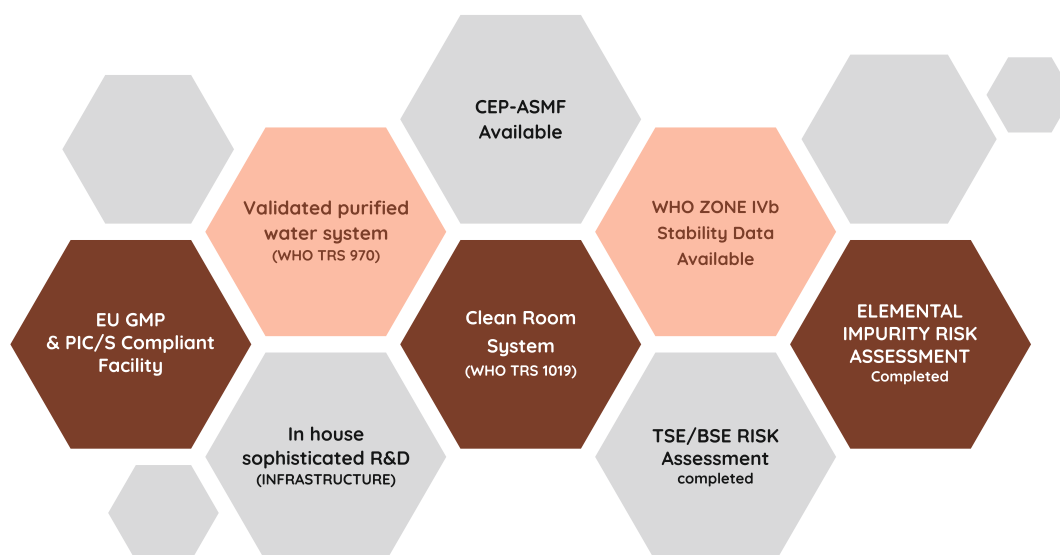

Narcotic substances

We maintain essential regulatory documents, including **CEP**, Active Substance Master Files(**ASMF**) and **Common Technical Document(CTD)** for all the products.

Ensuring Contamination proof production

The unit is equipped with validated **WHO TRS 1019** compliant Clean Room Areas using High Efficiency Particulate Air(HEPA) Filters and a closed loop water system complying to **WHO TRS 970**.

Capabilities

Manufacturing Facility Attributes

Well equipped sophisticated equipment for manufacturing of **hazardous chemical reactions** aligned with cGMP guidelines. Our reaction capability currently lies between -25°C to $+175^{\circ}\text{C}$.

- 1 Friedel-Crafts alkylation.
- 2 Grignard reaction.
- 3 Diels-Elder reaction.
- 4 Nucleophilic Substitution (SN1/SN2).
- 5 Clemmensen reduction
- 6 Halogenation
- 7 Milas Hydroxylation.
- 8 Oxidation

State of the art Glass Lined Reactors (GLRs) and other critical production equipments for manufacturing in a contamination free clean environment.

Dedicated Research & Development Centre led by highly experienced researchers for various contract development and in house R&D.

15+ Reactors for core production, an array of Centrifuges and Sparkler Filters and Vacuum based Dryers to achieve full fledged scalability to **20MT** per annum

Quality Assurance & Quality Control

ARK Healthcare quality policy is mandated and supported by the executive management and coordinated by an Independent **Corporate Quality Assurance (CQA)** Department. Quality Assurance functions are independent to manufacturing and performed during the process of manufacturing itself.

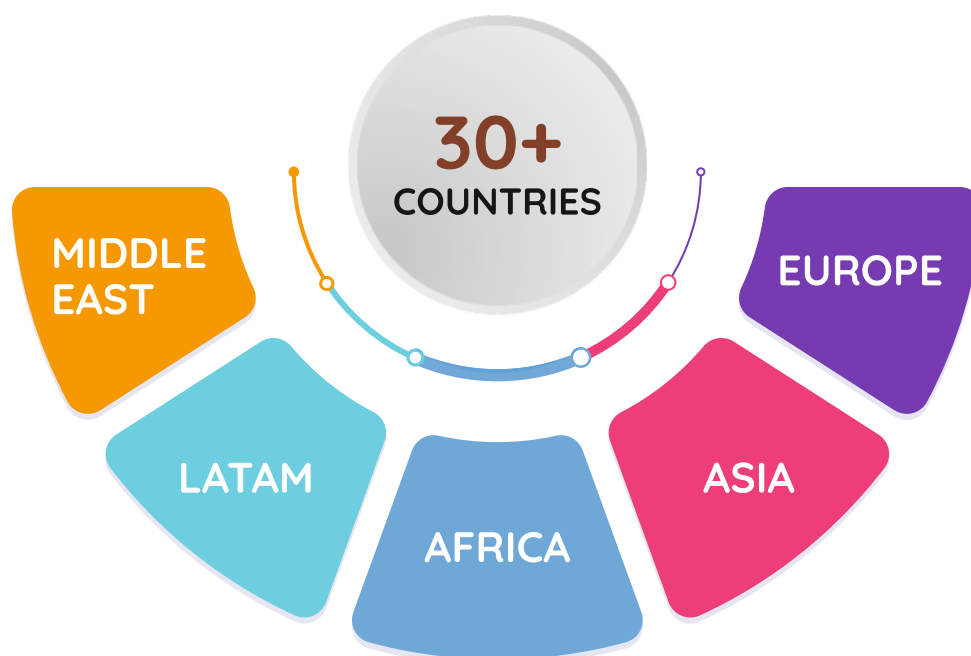

We have full fledged, well equipped analytical testing laboratory for carrying out all quality control tests. Analytical Method Validations are conducted as per **ICH guideline Q2(R2)**
